SUMMARY

Java Full Stack Developer with **4.5+** years of experience in designing, developing, and deploying scalable web applications using Java, **Spring Boot**, **Microservices**, and **React**. Experienced in **Agile/Scrum** methodologies, Strong expertise in **REST APIs**, **CI/CD**, containerization (**Docker, Kubernetes**), cloud platforms (**AWS, Azure**), database optimization, system integration, and secure authentication (**JWT, OAuth2**). Adept at delivering clean, maintainable, and high-performance solutions.

EXPERIENCE

Consultant | Birlasoft Limited | Pune
04/2022 – Present

- Designed and developed scalable REST API's using **Spring Boot**, **JDBC**, **Hibernate**, and **JPA**, enhanced with **Swagger** for clear documentation.
- Implemented **pagination**, **Schedulers** and **Redis caching** which improve performance, reduce server and database load, enhance response time it boosts efficiency **40-60%**.
- Implemented **microservices** architecture with **API Gateway**, **Config Server**, Eureka **load balancing**, and **Resilience4j circuit breakers**, **Prometheus**, **Grafana, Zipkin** improving system reliability by 40% and enabling seamless scaling.
- Developed and optimized business logic modules reducing bug reports by **20%** and improving response time by **15%.**
- Collaborated with cross-functional teams to analyze BRDs, design scalable architecture, and database schema, reducing rework by 25%.

SKILLS

Backend: Core Java, Spring Boot, REST APIs, Micro-services, JPA, JDBC, Hibernat

Databases: MongoDB, MySQL, Redis

Frontend: React.js, JavaScript, HTML, CSS

DevOps/Cloud: GitLab, Docker, AWS Azure, CI/CD Jenkins, Service Bus, Kubernetes

Testing: JUnit, Mockito, TDD

Tools: IntelliJ, STS, VS code, GitLab, Studio3T, MongoDB compass, Postman, Insomnia, Redis Insight, Service-Bus Explorer.

KEY ACHIEVEMENTS

- Migrated applications from PCF to Azure, upgraded to Java 17, and integrated Azure Key Vault for secure secrets
- Automated Subcon payroll report system saving $8,000 annually.
- Enhanced performance using Redis, multithreading, Spring Batch, pagination and Web Flux.

CERTIFICATES

- Spring MVC, Spring Boot

- Implemented **TDD** using **Mockito**, increasing unit test coverage to 85% and reducing production defects by 30%.
- Integrated message queuing architecture with Azure Service Bus to enhance scalability and reliability.
- Automated code quality checks using Sonar Lint and GitHub Copilot, reducing code smells by 40%.
- Deployed applications with Docker on cloud platforms, reducing infrastructure costs by 20%.
- Secured applications using JWT and OAuth2 authentication/authorization

Consultant | Techera IT Consulting Pvt Ltd | Pune
05/2021 – 03/2022

- Enhanced back-end services using **Spring Boot**, boosting system efficiency and scalability by **30%**.
- Integrated **Twilio messaging** service in our project for notification purpose.
- Delivered L2/L3 application support, resolving **95%** of incidents within SLA and reducing downtime by **20%.**
- Integrated logic for automated email notifications, reducing Jira tickets by **18%**.
- Configured **MongoDB** for large-scale data storage, improving query performance by **30%** and enabling faster analytics.
- Developed automated schedulers to handle recurring jobs, reducing manual effort by **50%** and improving process efficiency by **25%.**
- Implemented **pagination** in REST APIs, reducing payload size and improving API performance by **25%.**

EDUCATION

Bachelor of Engineering (Electronics & Telecommunication) | AVCOE Sangamner | 2016

- Spring - Cloud Overview
- Spring Data Repositories
- MongoDB with Java
- Docker for absolute beginners
- Generative AI

PROJECTS

My World portal
07/2022 – Present
Built a multi-module portal using Spring Boot microservices, React, MySQL, MongoDB, Redis, and Azure Service Bus, supporting 10,000+ active users with average API response times under 200ms.

Sub-con Dashboard
01/2024 – Present
Developed a Java & React dashboard to track subcontractor work hours across onsite/offshore teams, reducing payroll errors by **35%** and enabling automated PM approvals.

On Duty & Attendance System
06/2022 – Present
Engineered attendance system in Spring Boot & Angular, enabling automated shift tracking for 10,000+ employees and reducing manual HR effort by 40%.

Skill Taxonomy
05/2021 – 09/2022
Designed a taxonomy platform using Spring Boot, Angular 11, and MongoDB, improving skill-mapping accuracy by 30% across employee profiles.

Vendor Invoicing
05/2021 – 06/2022
Developed an invoicing system in Spring Boot & Angular 11, reducing invoice processing time by 25% and improving client payment accuracy.
