CAREER OBJECTIVE

As a with 5.6+ years of experience in Java development, I specialize in building scalable applications using Java, Spring Boot, Hibernate, and Microservices. I enjoy solving complex problems, collaborating with teams, and delivering reliable software solutions. I'm also passionate about learning new technologies and growing into a technical leadership role.

SUMMARY

Java Full Stack Developer with 5.6+ years of experience in Java, Spring Boot, Hibernate, Microservices, React, and REST APIs. Skilled in troubleshooting, problem-solving, performance optimization, and developing scalable applications. Experienced in Agile, CI/CD, cloud deployment, and cross-functional collaboration.

EDUCATION

BE (Electronics & Telecommunication)
AVCOE Sangamner | 2011 – 2016

CERTIFICATIONS

- Spring MVC, Spring Boot
- Spring - Cloud Overview
- Spring Data Repositories
- MongoDB with Java
- Docker for absolute beginners
- Generative AI, AI for You

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring Boot, Spring MVC, Hibernate, JPA

Architecture: Microservices, REST APIs

Frontend: React

Databases: MySQL, Oracle, MongoDB, Redis

Cloud & DevOps: Azure, Docker, Kubernetes, CI/CD, Azure DevOps, ACR, AKS, COLO, On-premise

Tools: Git, GitHub, Maven, SonarQube

Operating Systems: Linux, Unix

Monitoring: Actuator, Prometheus, Grafana

Testing: JUnit, Mockito

Version Control: Git, GitLab, Bitbucket, GitHub

Build & Code Quality: Maven, SonarQube, Black Duck, Orca

IDEs: IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), VS Code

Database Tools: MongoDB Compass, Studio 3T, Redis Insight

API & Messaging Tools: Postman, Insomnia, Service Bus Explorer

Remote/Server Tools: PuTTY, WinSCP

PORTFOLIO

[Portfolio](#)

PROFESSIONAL EXPERIENCE

Oracle.  Pune

Staff Consultant  02/206 – Present

Led **CHAMP application migration** from **Struts 1.2 to Struts 1.3.10, JDK 8 to JDK 21, and JBoss 6 to JBoss 8**, ensuring application compatibility and stability.

Upgraded key application dependencies and libraries, including **Jakarta, Spring Framework, Hibernate, Log4j, Apache POI, SLF4J, and Struts**

Migrated the legacy **ANT-based project to Maven**, standardizing build and dependency management.

Managed migration of **public and non-public JAR dependencies to JFrog Artifactory** and integrated them into the Maven build process.

Designed and configured **Harness CI/CD pipelines, Jenkins with SonarQube, Code Coverage, Veracode, and Black Duck** security/quality gates.

Created and configured **Harness organizations, repositories, access groups, and deployment pipelines**.

Migrated repositories from **Bitbucket to GitHub** and configured **Harness organizations, repositories, and access groups**.

Supported application deployment across **on-premises and cloud/colo environments**, including application and web server provisioning.

Managed **process accounts, PBrun privileged access, database batch accounts, Cloak ware aliases, CAPAM vaulting, and UPS role provisioning**. Unix server access.

Collaborated with cross-functional teams to ensure **secure, compliant, and reliable application migration and deployment**.

Birlasoft Limited.  Pune

Application Developer  04/2022 – 02/2026

Developed scalable REST API's using **Spring Boot, JDBC, Hibernate, and JPA**, enhanced with **Swagger** for clear documentation.

Implemented **pagination, Schedulers** and **Redis caching** which improve performance, reduce server and database load, enhance response time it boosts efficiency **40-60%**.

Developed and optimized business logic modules reducing bug reports by **20%** and improving response time by **15%**.

Analyzed **BRDs** and designed scalable architecture & database schema, reducing rework by **25%** during development.

Implemented **TDD** using **Mockito**, increasing unit test coverage to 85% and reducing production defects by 30%.

Implemented message queuing architecture with **Service Bus** to enhance application scalability and reliability.

Leveraged **GitHub Copilot & Sonar Lint** to automate code suggestions and enforce clean coding practices, cutting development time by **30%** and reducing code smells by **40%**.

Deployed and managed applications efficiently using **Docker** on cloud platforms reducing infrastructures costs by **20%**.

Integrated **JWT** and **OAuth** for robust authentication and authorization mechanisms.

Techera IT Consulting Pvt Ltd.  Pune

Consultant  05/2021 – 03/2022

Enhanced back-end services using **Spring Boot**, boosting system efficiency and scalability by **30%**.

Integrated **Twilio messaging** service in our project for notification purpose.

Delivered L2/L3 application support, resolving **95%** of incidents within SLA and reducing downtime by **20%**.

Integrated logic for automated email notifications, reducing Jira tickets by **18%**.

Configured **MongoDB** for large-scale data storage, improving query performance by **30%** and enabling faster analytics.

Developed automated schedulers to handle recurring jobs, reducing manual effort by **50%** and improving process efficiency by **25%**.

Implemented **pagination** in REST APIs, reducing payload size and improving API performance by **25%**.

PROJECTS

My World portal

 07/2022 – 02/2026

Built a multi-module portal using **Spring Boot microservices, React, MySQL, MongoDB, Redis, and Azure Service Bus**, supporting **10,000+ active users** with average API response times under **200ms**.

Sub-con Dashboard

 01/2024 – 02/2026

Developed a **Java & React dashboard** to track subcontractor work hours across onsite/offshore teams, reducing payroll errors by **35%** and enabling automated PM approvals.

On Duty & Attendance System

 06/2022 – 02/2026

Engineered attendance system in Spring Boot & Angular, enabling automated shift tracking for 10,000+ employees and reducing manual HR effort by 40%.

Skill Taxonomy

 05/2021 – 09/2022

Designed a taxonomy platform using **Spring Boot, Angular 11, and MongoDB**, improving skill-mapping accuracy by **30%** across employee profiles.

Vendor Invoicing

 05/2021 – 06/2022

Developed an invoicing system in **Spring Boot & Angular 11**, reducing invoice processing time by **25%** and improving client payment accuracy.

CHAMP

 02/2026 – Present

A java enterprise app with struct, JBoss 8, servlet/EJB descriptors, JSP, JS, oracle DB integration via JNDI data source and Hibernate config to manage the investment-management workflows.
